1. The **STAFF** Guest Wireless Network only supports devices with the 802.11 G or N standard wireless adapters. Make sure your laptop is G or N compatible before proceeding.

2. Click the Wireless icon in the top right hand bar on the OSX desktop. Select the **STAFF** Wireless Network and click connect:

![Wireless Network Selection](image)

3. Once connected to the **STAFF** Guest Wireless Network, Safari will auto launch asking you to Web Authenticate.
4. Your browser will load the login page. Enter your ADM username and password and click the ‘I agree with Chal 704-13 BYOD Policy’ button to login. The below graphic depicts this process:

5. Once you click the I Agree button your browser will re-direct to your home page.

6. You can now browse the Internet on the Challenger STAFF Guest Wireless Network.
