1. The **STAFF** Guest Wireless Network only supports devices with the 802.11 G or N standard wireless adapters. Make sure your laptop is G or N compatible before proceeding.

2. Click the Network icon in the system tray and select the **STAFF** Wireless Network and click connect.

3. Once connected to the **STAFF** Guest Wireless Network you are required to perform an initial “Web-Authentication” to provide your authorised login details and register your device. To do this open Internet Explorer.
4. Once you have opened Internet Explorer you will automatically be redirected to the login page. Enter your Staff ID username and password, and click the ‘LOG IN’ button to login:

Enter your Challenger username and password – please note ADM\ is NOT REQUIRED. Click on ‘LOG IN’.

If you enter the incorrect details at this screen, you will be presented with the following screen:

If you would like to try again, click the link for ‘login’ to return to the login screen.

If you keep having troubles with your login, try using the link below the ‘LOG IN’ button for the ‘Password Reset Tool’ which will launch the Quest tool (this will only work for you if you have already registered your 3 questions), or you will need to seek assistance from the ICT Service Desk on the number given.
5. After you initially login, you will be presented with the following screen that you must agree to, to be able to successfully use the Guest wireless network:

Read the “Acceptable Use Policy” terms (use the scroll bar on the right hand side to see the rest of the policy not showing), and then tick the box beneath this to acknowledge that you have read and accept the policy. You will then be able to click the ‘ACCEPT’ button to go to the next registration stage:
6. After accepting the Usage Policy, you will be presented with the following screen indicating that the login and device registration has been successful:

![Device registered successfully screen]

7. As mentioned on the last screen, the device must now be **DISCONNECTED** and **RECONNECTED** to the wireless STAFF network (do this by accessing the Network icon in the system tray again), to be able to access the internet on your personal laptop.

8. Once the staff user has successfully completed the above process – all subsequent connections to the STAFF wireless network will be automatic.
